

HOW BUSINESSES ARE GETTING SMART ABOUT STREAMLINING DATA COLLECTION AND ACCESS

Businesses across industries share common challenges when it comes to accessing data. Whether it's getting data from an inspection, customer discussion or research trial off a paper notepad and into the system or having complete, accurate and timely data for decision making, we've all experienced lags and challenges to integrity in data collection.

Meet Dexer: A heads-up, customized speech application and service that streamlines data collection and accessibility. We've thought about the challenges to streamlining data and measurement, so you don't have to.

DEXER

TRANSFORMS YOUR DATA COLLECTION

ELIMINATE DUPLICATION

- Eliminates need for transcription/edits to notes
- Notifies user of missing information while collecting data, eliminating return visits

ENHANCE QUALITY

- Trained to know what words and phrases are common in your collection
- Customized to structure the data for your business needs
- Structured data is supplemented with metadata

IMPROVE TURNAROUND

- Information gathered via voice and immediately structured to your system's needs
- Searchable, easy to pull up data within application

WORK SEAMLESSLY THROUGH INTEGRATIONS

- Can integrate with your existing systems making it real-time accessible to others within your team or organization
- Connects with other members of your team regardless of location

ADDED CONSISTENCY

- Requires a structured intake that provides consistency regardless of person collecting data
- Automated play-back ensures the notes are complete and captured accurately

Are you ready to improve efficiency in data collection and decision making while gaining access to more complete and consistent data? Dexer is an efficiency and accountability partner for your business. Learn how by visiting:
